Cloud Computing - Learning Materials

SmartCampus Cloud | Sample Student Resource

1. What is Cloud Computing?

Cloud computing provides computing services such as servers, storage, databases, networking, and software over a network.

2. Common Service Models

IaaS provides virtualized infrastructure; PaaS provides a platform for building and running applications; SaaS provides ready-to-use software.

3. Deployment Models

Common models include public cloud, private cloud, hybrid cloud, and community cloud.

4. Benefits

Potential benefits include scalability, flexible provisioning, access from different locations, and pay-as-you-go pricing. Costs still need monitoring.

5. Revision Questions

1. Expand IaaS, PaaS, and SaaS.
2. Give two examples of cloud resources.
3. Why is cloud cost monitoring important?
