Web Development - Sample Assignment

SmartCampus Cloud | Sample Student Resource

Objective

Practice HTML, CSS, and JavaScript by creating a simple student profile page.

Tasks

1. Create an HTML page with a title, heading, and student details.
2. Use CSS to style the page and make it responsive.
3. Add a JavaScript button that displays a welcome message.

Submission Checklist

Submit your HTML, CSS, and JavaScript files. Check that the page works in a browser and that the layout is readable on a mobile screen.

Important Note

This is a sample assignment for demonstration. Replace it with your instructor's official assignment before submitting academic work.
